

4.4 QUERY MENU

This function provides ad hoc retrieval of NASA Property Case data stored on the NPDMS Case File, NPDMS Transaction File, and NPDMS Table File.

NOTE: Please be sure that your site uses the AIM SUPER NATURAL parameter default values.

4.4.1 Queries Menu Processing

The Queries subsystem provides the NPDMS user direct access to Software AG's SUPER NATURAL for the online capability of retrieving data pertaining to both active and historical property disposal data. The system provides standard queries as well as ad hoc queries. The NPDMS Public Library in SUPER NATURAL contains a list of pre-constructed queries that were developed by the NPDMS Development Team.

NOTE: A list of pre-constructed queries that were developed by the NPDMS Development Team is shown in Appendix G.

- From the MAIN MENU (NDO000MB), type 1 at Enter Selection to access SUPER NATURAL.
- Press <Enter>

The SUPER NATURAL welcome screen is displayed:

```
